SUHAS H R

Lead Software Engineer | Cloud Platform Engineer | Full-Stack Developer

Bengaluru, India | hrsuhas15@gmail.com | +91-8792534150 | linkedin.com/in/hrsuhas15

PROFESSIONAL SUMMARY

Lead Software Engineer with 5+ years of experience designing and delivering scalable cloud-native platforms, distributed systems, and IoT solutions. Proven track record of owning products end-to-end, from architecture and database design to backend services, frontend development, production deployment, and operational excellence. Experienced in leading large-scale cloud migrations, building AI-powered developer tools, and designing highly scalable microservices on AWS. Strong background in DynamoDB data modeling, distributed architectures, and platform engineering.

CORE SKILLS

- Programming languages: Python, JavaScript and C++.
- Frameworks: Node.js, FastAPI, Vue.js, Spring Boot
- Cloud & AWS: Amazon DynamoDB, AWS Lambda, Amazon S3, Azure, GCP
- AI & Automation: LangChain, LLM Integration, Prompt Engineering, Reinforcement Learning
- Testing & DevOps: Playwright, Git, CI/CD, Docker

PROFESSIONAL EXPERIENCE

Samsung Research India — Lead Software Engineer *January 2021 – Present*

Bengaluru, India

- Owned the architecture, design, and end-to-end delivery of the Catalogs Web Portal, enabling manufacturers to efficiently manage IoT device metadata and configurations across the Samsung IoT ecosystem.
- Led the complete software development lifecycle including DynamoDB data model design, backend service implementation, REST API development, business logic, and Vue.js-based web interfaces.
- Delivered multiple large-scale IoT platform capabilities, including Offline Diagnostics, Device Discovery Optimization, Need Info Guide, Catalog Management, and Resource Management.
- Led the migration of production-scale data from Apache Cassandra to Amazon DynamoDB with zero downtime, including migration strategy, data consistency validation, and production cutover. With optimised single table design in dynamoDb.
- Championed the adoption of Playwright as the standard UI automation framework, improving regression testing quality, increasing automation coverage, and accelerating release cycles.
- Collaborated closely with product managers, architects, QA teams, and cross-functional engineering teams to successfully deliver multiple production releases.

KEY PROJECTS

AI-Powered Catalog Assistant

- Developed an AI-enabled assistant capable of understanding natural language requests to update catalog information and automate Jira ticket workflows using LLMs and LangChain.

Technology Stack: LangChain, Python, FastAPI

Multi-Cloud Workload Distribution Optimization Platform

- Designed and developed a cloud-native platform that intelligently distributes workloads across multiple cloud providers, considering resource availability, performance, latency, and infrastructure cost; explored reinforcement learning techniques to optimize workload placement decisions.

Technology Stack: Python, AWS, Azure, GCP, Reinforcement Learning

EDUCATION

Master of Technology (Online) — Data Science and Business Analytics *2023 – 2025*
Indian Institute of Science, Bengaluru

Bachelor of Engineering — Information Science and Engineering *2016 – 2020*
RV College of Engineering, Bengaluru
